

## Douglas B. King

Partner  
[douglas.king@dinsmore.com](mailto:douglas.king@dinsmore.com)

Indianapolis, IN  
Tel: (317) 860-5306

Doug's practice is almost exclusively civil litigation, typically for the defense. He has tried and defended toxic tort and chemical cases, drug and medical device product liability cases, asbestos cases, employment discrimination cases, insurance coverage cases, environmental suits, municipal liability claims, breach of contract and various commercial claims, and a wide variety of personal injury and wrongful death claims.

The heaviest concentration of Doug's work in personal injury defense is in products liability. He was appointed to the subcommittee for mass tort litigation of the Indiana Supreme Court Rules Committee, whose mission is to develop procedures and rules to facilitate and expedite the handling of asbestos and other mass tort cases for all of Indiana. He has tried numerous jury and bench trials in state and federal courts throughout Indiana, and in other states across the country including Illinois, Delaware, Pennsylvania, West Virginia, and Florida, resulting in a number of published decisions and landmark cases. He has defended manufacturers and distributors of a wide variety of products, devices, and substances over the last four decades.

Doug has worked with medical and scientific issues, such as diseases and birth defects allegedly resulting from exposure to asbestos, benzene, silica, coal tar pitch, polyaromatic hydrocarbons (PAHs), trichlorethylene, vinyl chloride, glutaldehyde, formaldehyde, and various other chemicals.

## **Experience**

**Successfully Defended Client in Wrongful Death Case**

We and co-counsel represented our client, a subsidiary of an automobile company, in the wrongful death case brought by a mechanic's family. The mechanic had worked in one of our client's dealerships for one to two years in 1965-1966 and worked on our client's brakes and clutches. The family claimed the mechanic was exposed to asbestos from these products, which caused his pleural malignant mesothelioma, and our client should have warned him that could happen. We argued and provided supporting evidence that our client didn't know at the time that any health hazards were associated with the mechanic's work with such friction materials, and that any asbestos emitted from those materials did not cause the mechanic's mesothelioma. The jury returned a defense verdict that our client was not liable.
